Microsoft Fabric Trial Setup, Developer Sandbox and F64 Activation

Part 1: Generating Your Free Business Identity

Since Microsoft Fabric does not support @gmail or @outlook, we will create a Developer Sandbox.

1. **Access the Portal:** Go to the Microsoft 365 Developer Program website.
2. **Sign In:** Use your existing **personal email** to log in.
3. **Registration:**
   - Select your **Country/Region**.
   - Enter a **Company Name** (e.g., "Fabric Course Project").
   - Choose your preferred language and click **Next**.
4. **Choose Sandbox Type:** Select **"Instant Sandbox"**. This pre-configures your domain and users instantly.
5. **Set Up Admin Credentials:**
   - **Admin Username:** Create a name (e.g., admin).
   - **Domain Name:** Create a unique domain (e.g., fabric-training-mohammed).
   - **Result:** Your new business email will be: admin@fabric-training-mohammed.onmicrosoft.com.
   - **Password:** Set a strong password and **save it**.
6. **Verification:** Enter your mobile number to receive a security code and finalize the setup.

Part 2: Activating the Fabric Free Trial

Once your Developer account is ready, you can activate the high-power F64 capacity.

1. **Login:** Open a private browser window (Incognito) and go to app.fabric.microsoft.com.
2. **Identity:** Sign in using the **newly created business email** (the .onmicrosoft.com one).
3. **Initiate Trial:**
   - Click the **Profile/Account icon** in the top-right corner.
   - Look for the **Start trial** button and click it.
4. **Activation:** On the pop-up screen, click **Activate**.
5. **Confirmation:** The Account Manager will now show a countdown (e.g., "59 days left"). You now have full access to Lakehouses, Warehouses, and Notebooks.

Step	Action
Create Workspace	Go to **Workspaces** > **+ New Workspace**.
Assign License	Under **Advanced Settings**, ensure **License Mode** is set to **Trial**.

Admin Access	Since you are the Developer Admin, you have full rights to the **Admin Portal** to enable/disable specific Fabric features.
