

Exercise – Social Media Tools

Research Social Media Tools:

As part of your Game Production assignment you must write a report on social media tools.

A list of social media tools used for collaboration was presented in the lecture. There are also many more social media tools that can be used for working with online teams.

Research these tools and choose one or more to use when working on your Game Production assignment.

Answer the following questions for the tool or tools your group has chosen to use:

1. Which tool(s) did you choose?
2. What are the features of the chosen tool(s)?
3. Why did your team choose to work with this tool(s)?

Once you have finished developing your game, you will be able write an evaluation of your chosen tool(s). This evaluation should list what was good about using the tool, and what was bad (if anything).

Keep a record of your answers for this exercise and use them when you write your report at the end of the Game Production assignment.
