

Excel Settings You Should Change Now

1. Pressing ENTER in Excel

By default, pressing Enter moves the cursor down.

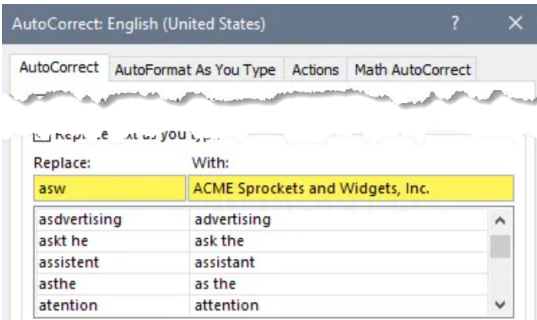

C	D
Quantity	
46	138
179	

In **Advanced** Options, find **"After pressing Enter, move selection."** Choose a direction or uncheck the box to stay in the cell.

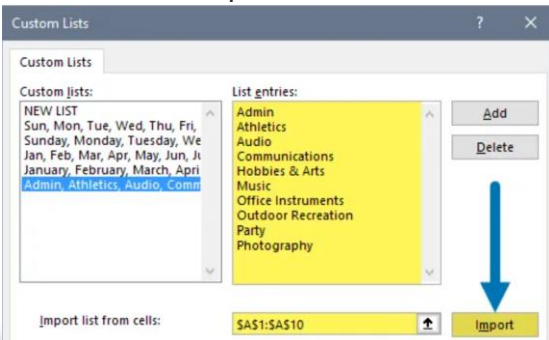

2. AutoCorrect for Shortcuts

Define shortcuts for frequently used text:

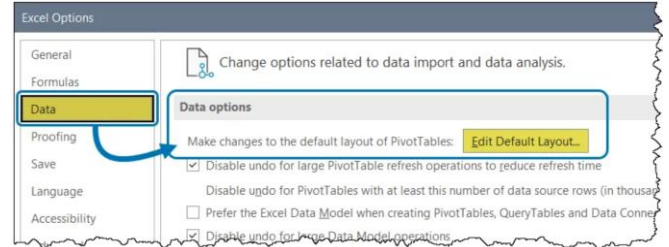

3. Create Custom Lists

Autofill daily lists by typing and highlighting them in Excel. Then import as a custom list.

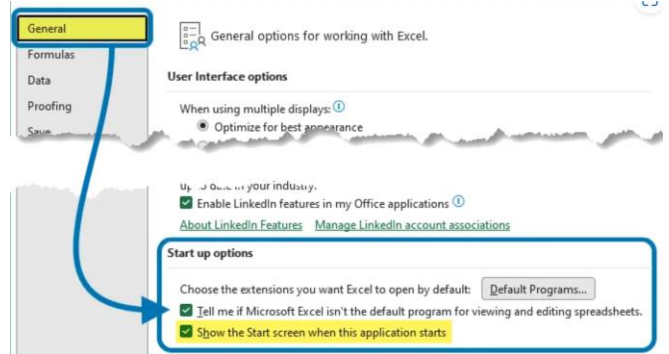

4. Custom Pivot Table Layout

Set your own default Pivot Table layout options:

5. Change Startup Options

Turn Off the Start Screen to Open Excel Directly to a Blank Workbook.

6. Keep Leading Zeroes

Change Data settings to prevent Excel from removing leading zeroes automatically.
